A History of the Cascadia Combinatorial Feasts

Brian Alspach   Robert A. Beezer   Amites Sarkar

November 4, 2024

This is a brief history of the Cascadia Combinatorial Feasts (known until 2019 as the Combinatorial Potlatches) and their speakers. It was maintained by Brian Alspach (BA) through November 2001, then by Robert Beezer (RAB) through the 2016 edition. Send additions, clarifications and corrections to Amites Sarkar, `amites.sarkar@wwu.edu`. Copyright 2002-2024, Licensed with a Creative Commons BY-SA License.

      Minimally unavoidable graphs for a cycle of length 4

BA: You will note that Richard Weiss is listed as giving the same talk at two consecutive Potlatches. I vaguely recall that Richard had to cancel his appearance for the first of the two listed so that I think the later listing is correct. I undoubtedly have an early announcement in my files. It is certainly the case that he talked only once.
